Education

University of Leicester (Achieved: First Class Honours)

September 2023 - July 2026

Key Modules: Foundation of Artificial Intelligence, Software Architecture and System Development, System and Data Analysis, User Interface Design and Evaluation

West Coventry Academy

September 2021 - July 2023

A Level: **Mathematics, Economics, Computer Science**

St Bonaventure's

September 2016 - July 2021

GCSE: Grades 9-1 including **Mathematics, English Language/Literature, Science**

Work Experience

SACHDEV'S CHARTERED ACCOUNTANCY, INTERN

July 2025 - August 2025

- Automated financial reporting workflows for 10+ SME clients (£5M+ combined revenue) using Xero/Pixie APIs and custom scripts.
- Developed process automation solutions, implemented system integrations, and provided technical support for client-facing software.
- Achieved 15% efficiency improvements in automated reporting processes, streamlined £2M+ transaction volume processing through technical optimisation.

AMPLIFYME, VIRTUAL INTERNSHIP - M&A AND MARKETS SIMULATION

August 2024

- Selected for competitive technology-focused simulation for £200m cross-border acquisition among 200+ global participants.
- Built comprehensive financial modelling applications, developed analytical dashboards, and delivered technology-focused investment recommendations.
- Achieved top 25% for strategic analysis and top 20% for presentation, demonstrating technical problem-solving under tight deadlines.

KAINOS, STUDENT INTERN

March 2022 - April 2022

- Integrated into an agile development team delivering enterprise software solutions for clients with 1000+ daily users
- Developed responsive React.js applications, collaborated on full-stack development, engaged in code reviews and sprint planning.
- Achieved 20% increase in client satisfaction and 30% improvement in user engagement metrics through optimised UX implementation.

Key Projects

LEVERAGED BUYOUT ANALYSIS PLATFORM | PYTHON, NUMPY FINANCIAL, MATPLOTLIB, TABULATE

- Analysed financial datasets using Python (NumPy, Pandas) for investment analysis and build predictive models across multiple industry sectors using Python and advanced algorithms
- Implemented comprehensive data processing pipeline with financial modelling capabilities, and predictive analysis
- Created scalable analytical tool demonstrating quantitative programming methodologies and software engineering.

REAL-TIME STOCK PORTFOLIO TRACKER | REACT.JS, AXIOS, CHART.JS, BOOTSTRAP

- Built real-time investment tracking portfolio monitoring and risk management analytics across equity markets.
- Integrated live-market APIs with React frontend, implemented Chart.js visualisation, and responsive financial data visualisation.
- Built a platform with 99.9% uptime for end-users, bridging quantitative analysis with modern technology infrastructure.

M&A DEAL VISUALISER | REACT.JS, CSV EXPORT, CHART.JS, BOOTSTRAP

- Created a comprehensive business intelligence platform analysing large datasets for strategic insights.
- Developed interactive data visualisation tool with advanced filtering capabilities, sector-based analysis, and CSV export functionality.
- Delivered scalable data platform, showcasing database management and data-driven decision-making capabilities.

Responsibilities and Achievements

UNIVERSITY OF LEICESTER INVESTMENT GROUP (ULIG) - Member

June 2025 - Present

- Selected for Europe's largest student managed fund with \$5m assets under management, focusing on growth sector analysis.
- Conduct comprehensive business research including financial statement analysis, comparable company valuations, and sector trend analysis for technology and healthcare investments.
- Contributing to organisational performance through rigorous analytical processes and strategic research methodologies.

EXPLORE LEARNING, TUTOR

June 2024 - Present

- Appointed to deliver personalised academic coaching for 15+ students (aged 8-16) in Mathematics and English curriculum.
- Maintained stakeholder communication, implemented tracking systems, and designed strategies tailored to each student.
- Achieved 20% average performance improvement while developing leadership through educational mentorship.

Technical Skills:

- Programming:** Python, Java, JavaScript, HTML, CSS, React.js, SQL
- Frameworks:** REST APIs, React.js, Axios, Chart.js, Bootstrap, Microsoft Office (Advanced), Xero, Pixie, Bash, GitHub
- Finance/Modelling:** Financial Modelling (LBO, DCF), Analytical Thinking, Commercial Awareness, Problem Solving, Stakeholder Management
